Description								
Reimbursement to counties by prisoners and increasing drunk driving penalties								

#### **Assumptions Used in Arriving at Fiscal Estimate**

#### **BILL SUMMARY**

The bill changes the monetary and imprisonment penalties for operation of a motor vehicle while under the influence of an intoxicant or controlled substance offenses (OWI).

Under current law, a county may seek reimbursement from a person who was confined to the county jail for the actual per-day cost of maintaining the person in the jail, for the cost of investigating the person's financial status, and for other county expenses related to collecting the reimbursement.

Under this proposal, if the county decides to seek reimbursement from a person who was confined in the county jail as the result of an OWI-related violation, the Department of Transportation (DOT) may not reinstate the violator's operating privilege until the county notifies DOT that the person has reimbursed the county or that the county is no longer seeking reimbursement from the person.

#### **ASSUMPTIONS**

The bill increases the monetary and imprisonment penalties for certain OWI offenses. It also makes persons convicted of those charges ineligible for home detention, good time, work release, work camp, or community service release during a period of their imprisonment. These monetary and imprisonment penalties may cause more of these convicted drivers to be unable to pay the fines, thus causing more license suspensions for failure to pay forfeiture (FPF).

The court will most likely suspend those drivers unable to pay fines for FPF due to the increase in the amount of the fine or as a result of imprisonment. While this would cause an increase in the number of suspensions created, the number of new suspensions cannot be determined. Additionally, it is believed there would not be a determinable increase in the number of reinstatements resulting from the new FPF suspensions because the driver would most likely be reinstating from the underlying OWI revocation anyway.

This proposal provides that if the county decides to seek reimbursement from a person who was confined in the county jail as the result of an OWI-related violation, the DOT may not reinstate the violator's operating privilege until the county notifies DOT that the person has reimbursed the county or that the county is no longer seeking reimbursement from the person. This requirement may delay a person's ability to reinstate his operating privilege because he is unable to pay what could be significant reimbursement fees thereby increasing the likelihood he will drive without a valid license and possibly suffer other ramifications, such as loss of employment.

Under this proposal, courts must change the method used to report conviction and revocation data to DOT. The Consolidated Court Automation Program (CCAP) would need programming changes to allow the court to report when reimbursement is ordered and when the reimbursement has been paid. Likewise, DMV's driver license issuance application would need programming changes to stop reinstatement of a person's operating privilege until notified by the court the reimbursement had been paid. The system will also need to allow DMV field processors to enter reimbursement information should the person appear at a DMV Service Center with proof of payment.

#### CONCLUSION

The fiscal effect of the possible additional FPF license suspensions resulting from increasing fines or terms of imprisonment cannot be determined. There is no way of knowing how many additional suspensions would result from the changes proposed.

The expected cost for computer program changes and updates necessary to implement the requirement of reimbursement for the costs associated with maintaining a person in jail and the cost associated with collecting the reimbursement is approximately \$186,100. These changes and updates would allow the significant processing of this requirement to be automated, except for those occasions where a person required to pay the reimbursement may desire to provide proof of payment at a DMV Service Center. The number of persons choosing to take the information to the DMV Service Center is impossible to determine, therefore any additional costs for the manual updates is indeterminate.

The fiscal affect on local government is indeterminate. Delaying reinstatement of these people's operating privilege will be incentive for them to pay the reimbursement and pay it in a timely fashion. The ability to collect these reimbursements may also be incentives for more courts to order reimbursement as part of sentencing. The amount of additional revenue the counties will receive is not known.

**Long-Range Fiscal Implications** 

## Fiscal Estimate Worksheet - 2009 Session

Detailed Estimate of Annual Fiscal Effect

Introduction Number		Original		Updated		Corrected		Supplemental		
Reimbursement to counties by prisoners and increasing drunk driving penalties  I. One-time Costs or Revenue Impacts for State and/or Local Government (do not include in annualized fiscal effect):  The expected cost for computer program changes and updates necessary to implement the requirement of reimbursement for the costs associated with maintaining a person in jail and with collecting the reimbursement are estimated to be approximately \$186,100.
